

Biopharmaceutical Single-Use Technology

Tubing and tubing integrated systems

Focus on the advanced material technology & manufacture in Life Science:

Rely on more than 20 years of experience in **the advanced material technology** & manufacture, focus on the development and manufacturing of disposable high-performance tubing and disposable tubing integrated system products, we do commit to meet the high-quality needs of the critical fluid transmission and fluid management in biopharmaceutical industry.

Implements ISO 9001 & ISO 13485 Quality Management System:

Locate in Building 4, Sapphire Park, Lingang New Area, Shanghai, China, 3200 square meters factory building in the first phase, and strictly implement the **ISO 9001 & ISO 13485** quality management system, all biopharmaceutical grade products are manufactured in the 10K Class level clean room.

Key Markets: Vaccine、Biosimilar、Antibody drug、Plasma、CGT

Sampling, Split Charging, Transferring, Pumping, Loading, SIP, CIP, Cell culture, fermentation, Chromatography, Filtration, Final Filling, Aseptic Sealing, Aseptic Welding • • • • •

MedFlex® 360 Biopharmaceutical TPE Weldable tubing -AES

- Well Sealing & Welding, excellent internal surface smoothness
- Widely used in liquid storage bags, mixing bags & bioreactors
- Good cross-welding adaptability with C-Flex & AdvantaFlex TPE tubing
- Steam sterilization, electron gamma irradiation sterilization & ETO
- ADCF materials formula and & full regulation documents
 - ✓ USP 85,87,88,381,643 & 661
 - ✓ ISO10993-3, 5, 10 &11
 - ✓ European Pharmacopeia 3.2.9
 - ✓ Extractables report base on FDA & BPOG standards

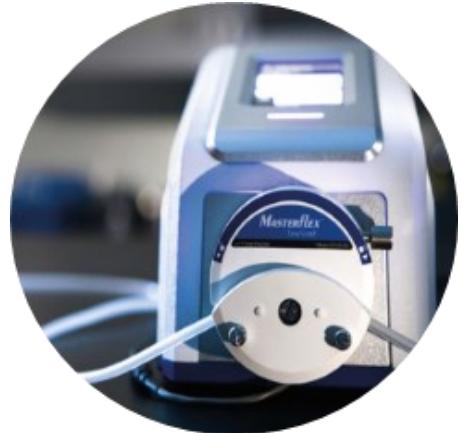

MedFlex® SIL150 Biopharmaceutical platinum silicone tubing-AST

- Good Peristaltic pump performance, pump life reach 60 hr@600RPM
- High-temperature resistance, online steam sterilization SIP & CIP
- Used for **bioreactors, cell culture, filtration, sampling** and filling
- Steam sterilization, electron gamma irradiation sterilization & ETO
- ADCF materials formula and & full regulation documents
 - ✓ USP 85,87,88,381 & 661
 - ✓ ISO10993-3, 5, 10 &11
 - ✓ European Pharmacopeia 3.1.9
 - ✓ Extractables report base on FDA & BPOG standards

MedFlex® SIL250 High Purity Biopharmaceutical Pt silicone tubing -ASL

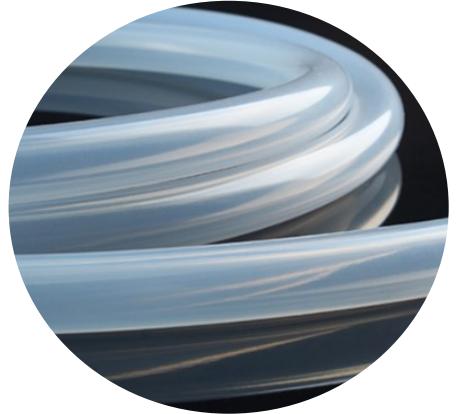

- Designed for **downstream and final filling** of pharmaceutical.
- Extremely low material dissolution ensures fluid high purity.
- Steam sterilization, electron gamma irradiation sterilization & ETO
- ADCF materials formula and & full regulation documents
 - ✓ USP 85,87,88,381 & 661
 - ✓ ISO10993-3, 5, 10 &11
 - ✓ European Pharmacopeia 3.1.9
 - ✓ Extractables report base on FDA & BPOG standards

MedFlex® SIL050 Biomedical sanitary grade Pt silicone tubing-ASC

- Designed for **long pump life application** up to 150hrs@600RPM
- Steam sterilization, gamma irradiation sterilization & ETO
- ADCF materials formula and & full regulation documents
 - ✓ ISO10993
 - ✓ USP 85, 88,151&788
 - ✓ Extractables report base on FDA & BPOG standards

MedFlex® SIL170 Biopharmaceutical Pt silicone pressure tubing-ASH

- Designed for SIP and CIP pressure resistant steam sterilization.
- General **working pressure to 4bar**, Max burst pressure to 12bar
- NO wire design and No Particles residue when cutting.
- Steam sterilization, gamma irradiation sterilization & ETO
- ADCF materials formula and & full regulation documents
 - ✓ ISO10993
 - ✓ USP 85, 88,151&788
 - ✓ Extractables report base on FDA & BPOG standards

MedFlex® SIL170HP Biopharmaceutical Pt silicone braided tubing-ASH-R

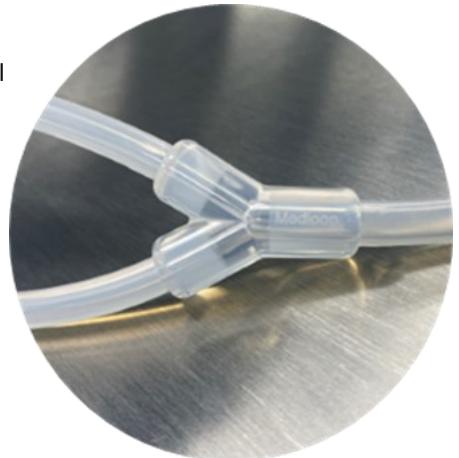

- Designed for SIP and CIP pressure resistant steam sterilization.
- General **working pressure to 10bar**, Max burst pressure to 20bar
- Steam sterilization, gamma irradiation sterilization & ETO
- ADCF materials formula and & full regulation documents
 - ✓ ISO10993
 - ✓ USP 85, 88,151&788
 - ✓ Extractables report base on FDA & BPOG standards

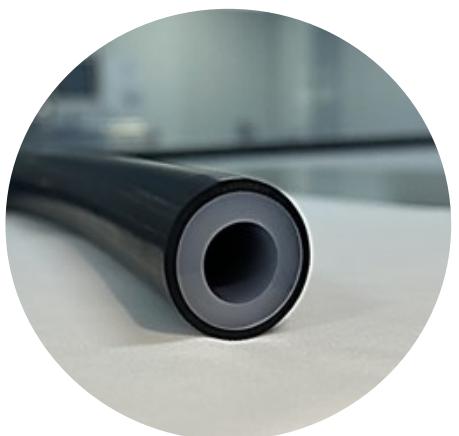

Medloop® Biopharmaceutical platinum silicone molded manifolds

- Developed for **zero leakage** risk applications in downstream biopharmaceutical
- Unique inner channel design effectively reduce fluid & particles residual
- Molded design replacing cable ties greatly reduce risk of leakage
- Steam sterilization, electron gamma irradiation sterilization & ETO
- ADCF materials formula and & full regulation documents
 - ✓ USP 85,87,88,381 & 661
 - ✓ ISO10993-3, 5, 10 &11
 - ✓ European Pharmacopeia 3.1.9
 - ✓ Extractables report base on FDA & BPOG standards

MedFlex® SIL250 Light avoidance Pt silicone tubing -ASL BK

- Designed for the application of **light sensitive fluid processing**.
- The inner layer ensures the medicine is clean and pollution-free
- Outer layer coextrusion technology without material layering
- ADCF materials formula and & full regulation documents
 - ✓ USP 85,87,88,381 & 661
 - ✓ ISO10993-3, 5, 10 &11
 - ✓ European Pharmacopeia 3.1.9
 - ✓ Extractables report base on FDA & BPOG standards

MedFlex® 365 Sanitary grade ultra long-life rubber tubing -AYL

- **Ultra Long peristaltic pump life** up to 1000hrs@600RPM
- Better chemical resistance than silicone and TPE materials
- Steam sterilization, gamma irradiation sterilization & ETO
- ADCF materials formula and & full regulation documents
 - ✓ ISO10993
 - ✓ USP 85, 88,151&788
 - ✓ Extractables report base on FDA & BPOG standards

Item size rule description: AES-0125-0250 or AES-0125-0250L

1. AES is the MedFlex® product formula series, 0125 is ID ,0250 is OD of tubing.
2. AES is MedFlex® 360 TPE weldable tubing; AST is MedFlex SIL150 Pt Si tubing, ASL is SIL250, ASC IS SIL050.
3. Without Suffix means 15 meters length per package; Suffix L means 30 meters length, Suffix S means 7.5 meters length.

MedFlex®

High quality tubing for Bioprocessing

Comments: Pump tests conducted used Cole Parmer Masterflex® 17 standard pump heads using MedFlex® ID0.25" x OD0.375" tubing, run continuously at 600 rpm to failure with zero back pressure and water as a medium.
